ROHIT KUMAR SAMAD

DevOps & Platform Engineer | Observability, Kubernetes, CI/CD, Cloud Infrastructure
rohitsamad4@gmail.com | +91 9877495221 | linkedin.com/in/rohit1010

SUMMARY

- DevOps and platform engineer with 4+ years of hands-on experience running Kubernetes, CI/CD, and monitoring platforms in production, achieving a 99.98% SLA.
- Built centralized logging, dashboards, and alerting with ELK, Prometheus, and Grafana, enabling real-time insight and faster incident response.
- Built highly available, auto-scaled infrastructure using Terraform, Ansible, and Kubernetes, and led cloud migration and modernization through automation.
- Implemented DevSecOps with automated scanning and compliance checks, reducing vulnerabilities and audit risk.
- Experienced with cloud environments including Huawei Cloud (Flexible Engine) and on-premises cloud infrastructure, with IAM enforced across Kubernetes clusters.

TECHNICAL SKILLS

- **Observability & Monitoring:** Prometheus, Grafana, ELK Stack, Kibana dashboards, alerting, log analysis (3+ years)
- **DevOps & CI/CD:** GitLab CI, pipeline design, artifact versioning, Kaniko image builds, automated testing and scanning (3+ years)
- **Infrastructure as Code & Configuration Management:** Terraform, Ansible, Helm, Git (3+ years)
- **Containers & Orchestration:** Docker, Kubernetes, Helm, Rancher, autoscaling, rolling deployments (2+ years)
- **Cloud:** Flexible Engine (Huawei Cloud), on-premises cloud EC2 instances, Nginx ingress, security groups (3+ years)
- **Security & Identity:** IAM, OpenLDAP, LemonLDAP-NG, HashiCorp Vault, Ansible Vault, secrets management, Gitleaks, DefectDojo (2+ years)
- **Scripting & Linux:** Bash scripting, Linux system administration (4+ years)

PROFESSIONAL EXPERIENCE

Orange Business | System Software Engineer *July 2021 – Present*

- Built and ran Kubernetes and CI/CD environments on on-premises cloud EC2 instances and the Huawei Cloud (Flexible Engine) environment, including Consul service registration.
- Built centralized logging and monitoring with ELK, Prometheus, and Grafana for real-time insight and faster incident response.
- Optimized resource usage, autoscaling, Nginx ingress, and logging and metrics settings for cost-efficient operations.
- Migrated VMs to Kubernetes using Helm and Rancher, running rolling deployments and using AI4Ops for anomaly detection and uptime monitoring.
- Developed GitLab CI pipelines with automated testing, image builds, and security scanning.
- Integrated DevSecOps tools (Gitleaks, DefectDojo, Kaniko) into CI/CD for secure, automated pipelines.
- Secured secrets with HashiCorp Vault and Ansible Vault, and enforced IAM across Kubernetes clusters.
- Performed Linux system administration, including installation, patching, upgrades, and performance tuning to support Kubernetes and CI/CD environments.
- Wrote bash scripts that pull data from a lifecycle API to identify expired accounts and update user records in OpenLDAP and LemonLDAP-NG.
- Opened security groups on on-premises EC2 instances for flow enablement.
- Collaborated with developers, architects, and on-call teams on IaC, observability, and production readiness.

Virtually Testing Foundation | Intern *January 2021 – March 2021*

- Updated container images and backup processes.
- Created VM storage policies.

EDUCATION

Lovely Professional University, Jalandhar | B.Tech, Information Technology *August 2017 – July 2021*
Sri Chaitanya Techno School, Visakhapatnam | Intermediate (Non-Medical) *2015 – 2017*

WORKSHOPS

- Red Hat Certified System Administrator (RHCSA) workshop
- Virtually Testing Red Team Workshop
