ROHIT KUMAR SAMAD

DevOps Engineer | Kubernetes, CI/CD, Linux, DevSecOps
rohitsamad4@gmail.com | +91 9877495221 | linkedin.com/in/rohit1010

SUMMARY

- DevOps and infrastructure engineer with 4+ years of experience operating on-premises and hybrid cloud platforms, including Kubernetes clusters, CI/CD pipelines, and Linux infrastructure.
- Built highly available, auto-scaled infrastructure using Terraform, Ansible, and Kubernetes, achieving a 99.98% SLA.
- Implemented DevSecOps practices with automated scanning and compliance checks, reducing vulnerabilities and audit risk.
- Led cloud migration and modernization, migrating VMs to Kubernetes and cutting operational overhead through automation.

TECHNICAL SKILLS

- **Containers & Orchestration:** Docker, Kubernetes, Helm, Rancher (2+ years)
- **Infrastructure & Automation:** Terraform, Ansible, Git, Nginx, Linux (3+ years)
- **CI/CD & Release:** GitLab CI, Kaniko, image builds, artifact versioning (3+ years)
- **Observability & Monitoring:** Prometheus, Grafana, ELK Stack, Kibana dashboards (3+ years)
- **Security & Identity:** IAM, OpenLDAP, LemonLDAP-NG, HashiCorp Vault, Ansible Vault, secrets management, Gitleaks, DefectDojo (2+ years)
- **Scripting & OS:** Bash scripting, Linux system administration (4+ years)
- **Networking:** Open security groups, instance registration with Consul, Nginx ingress

PROFESSIONAL EXPERIENCE

Orange Business | System Software Engineer July 2021 – Present

- Built and maintained Kubernetes and CI/CD environments on on-premises cloud EC2 instances and the Huawei Cloud (Flexible Engine) environment.
- Migrated VMs to Kubernetes using Helm and Rancher, running rolling deployments and using AI4Ops for anomaly detection and uptime monitoring.
- Developed GitLab CI pipelines with automated testing, image builds, and security scanning.
- Integrated DevSecOps tools (Gitleaks, DefectDojo, Kaniko) into CI/CD for secure, automated pipelines.
- Built centralized logging and monitoring with ELK, Prometheus, and Grafana for real-time insights and faster incident response.
- Secured secrets with HashiCorp Vault and Ansible Vault, and enforced IAM across Kubernetes clusters.
- Performed Linux system administration, including installation, patching, upgrades, and performance tuning to support Kubernetes and CI/CD environments.
- Optimized resource usage, autoscaling, Nginx ingress, and logging/metrics settings for cost-efficient operations.
- Wrote bash scripts that pull data from a lifecycle API to identify expired accounts and update user records in OpenLDAP and LemonLDAP-NG.
- Opened security groups on on-premises EC2 instances for flow enablement and registered instances in Consul.
- Collaborated with developers and architects on IaC, observability, on-call processes, and production readiness.

Virtually Testing Foundation | Intern January 2021 – March 2021

- Updated container images and backup processes.
- Created VM storage policies.

EDUCATION

Lovely Professional University, Jalandhar | B.Tech, Information Technology August 2017 – July 2021
Sri Chaitanya Techno School, Visakhapatnam | Intermediate (Non-Medical) 2015 – 2017

WORKSHOPS

- Red Hat Certified System Administrator (RHCSA) workshop
- Virtually Testing Red Team Workshop
