# ROHIT KUMAR SAMAD

DevOps Engineer | CI/CD, Kubernetes, Terraform, Observability, Linux
rohitsamad4@gmail.com | +91 9877495221 | linkedin.com/in/rohit1010

---

## SUMMARY

- DevOps engineer with 4+ years of experience building and operating CI/CD pipelines, containerized platforms, and Kubernetes clusters in production, achieving a 99.98% SLA.
- Built highly available, auto-scaled infrastructure using Terraform, Ansible, and Kubernetes, and led cloud migration and modernization through infrastructure automation.
- Built CI/CD pipelines in GitLab CI with automated testing, image builds, and security scanning, and integrated DevSecOps tools into delivery workflows.
- Built centralized monitoring, logging, and alerting with Prometheus, Grafana, and the ELK Stack for real-time visibility and faster incident response.
- Automate routine operations with Bash scripting and Linux administration.

## TECHNICAL SKILLS

- CI/CD & Release: GitLab CI, pipeline design, automated testing, artifact versioning, Kaniko image builds (3+ years)
- Infrastructure as Code & Automation: Terraform, Ansible, Helm, Git (3+ years)
- Containers & Orchestration: Docker, Kubernetes, Helm, Rancher, autoscaling, rolling deployments (2+ years)
- Observability & Monitoring: Prometheus, Grafana, ELK Stack, Kibana dashboards, alerting (3+ years)
- Scripting & Linux: Bash scripting, Linux administration, performance tuning (4+ years)
- Cloud: Flexible Engine (Huawei Cloud), on-premises cloud EC2 instances, Nginx ingress (3+ years)
- Security & Secrets: HashiCorp Vault, Ansible Vault, IAM, OpenLDAP, LemonLDAP-NG, Gitleaks, DefectDojo (2+ years)

## PROFESSIONAL EXPERIENCE

**Orange Business | System Software Engineer July 2021 – Present**

- Built highly available, auto-scaled infrastructure using Terraform, Ansible, and Kubernetes, achieving a 99.98% SLA.
- Developed GitLab CI pipelines with automated testing, image builds, and security scanning.
- Integrated DevSecOps tools (Gitleaks, DefectDojo, Kaniko) into CI/CD for secure, automated pipelines.
- Migrated VMs to Kubernetes using Helm and Rancher, running rolling deployments and using AI4Ops for anomaly detection and uptime monitoring.

- Built centralized logging and monitoring with ELK, Prometheus, and Grafana for real-time insight and faster incident response.
- Optimized resource usage, autoscaling, Nginx ingress, and logging and metrics settings for cost-efficient operations.
- Secured secrets with HashiCorp Vault and Ansible Vault, and enforced IAM across Kubernetes clusters.
- Performed Linux system administration, including installation, patching, upgrades, and performance tuning to support Kubernetes and CI/CD environments.
- Wrote bash scripts that pull data from a lifecycle API to identify expired accounts and update user records in OpenLDAP and LemonLDAP-NG.
- Built and ran Kubernetes and CI/CD environments on on-premises cloud EC2 instances and the Huawei Cloud (Flexible Engine) environment.
- Worked with developers and architects on IaC, observability, on-call processes, and production readiness.

**Virtually Testing Foundation | Intern January 2021 – March 2021**

- Updated container images and backup processes.
- Created VM storage policies.

## EDUCATION

Lovely Professional University, Jalandhar | B.Tech, Information Technology August 2017 – July 2021
Sri Chaitanya Techno School, Visakhapatnam | Intermediate (Non-Medical) 2015 – 2017

## WORKSHOPS

- Red Hat Certified System Administrator (RHCSA) workshop
- Virtually Testing Red Team Workshop

## ADDITIONAL INFORMATION

- Soft skills: Collaboration, leadership, teamwork, communication, problem-solving
- Languages: English, Hindi
- Interests: Photography, trekking, music, cooking
