ROHIT KUMAR SAMAD

SRE / Platform Engineer | Kubernetes, Observability, Secrets Management, Incident Response
rohitsamad4@gmail.com | +91 9877495221 | linkedin.com/in/rohit1010

Summary

Platform and reliability engineer with 4+ years of hands-on experience running production Kubernetes, CI/CD, and Linux infrastructure in hybrid environments. Built highly available, auto-scaled platforms achieving a 99.98% SLA. Builds monitoring and alerting with Prometheus, Grafana, and ELK, manages secrets with HashiCorp Vault, and works with developers and architects on on-call, observability, and production readiness.

Core Competencies

- Observability & Alerting: Prometheus, Grafana, ELK Stack, Kibana dashboards
- Incident Response & Production Readiness: on-call processes, centralized logging for faster triage
- Kubernetes & Containers: Helm, Rancher, Docker, autoscaling, rolling deployments, Nginx ingress
- Secrets & Identity: HashiCorp Vault, Ansible Vault, IAM across clusters, OpenLDAP, LemonLDAP-NG
- CI/CD & DevSecOps: GitLab CI, Kaniko, Gitleaks, DefectDojo, artifact versioning
- Infrastructure as Code: Terraform, Ansible, Git
- Scripting & Linux: Bash automation, Linux administration, performance tuning
- Cloud: Huawei Cloud (Flexible Engine), on-premises cloud instances

Professional Experience

System Software Engineer | Orange Business July 2021 – Present

- Built and operated highly available, auto-scaled Kubernetes and CI/CD environments across on-premises cloud instances and Huawei Cloud (Flexible Engine), achieving a 99.98% SLA.
- Built centralized logging, metrics, and alerting with ELK, Prometheus, and Grafana for real-time visibility and faster incident response.
- Took part in on-call processes and production readiness work alongside developers and architects.
- Optimized resource usage, autoscaling, Nginx ingress, and logging/metrics settings for cost-efficient operations.
- Migrated VMs to Kubernetes using Helm and Rancher, running rolling deployments and using AI4Ops for anomaly detection and uptime monitoring.
- Secured secrets with HashiCorp Vault and Ansible Vault and enforced IAM across Kubernetes clusters.
- Developed GitLab CI pipelines with automated testing, image builds, and security scanning, integrating Gitleaks, DefectDojo, and Kaniko.
- Wrote Bash automation that pulls data from a lifecycle API to identify expired accounts and sync user records to OpenLDAP and LemonLDAP-NG.
- Administered Linux servers, including installation, patching, upgrades, and performance tuning for Kubernetes and CI/CD workloads.
- Configured network security groups for flow enablement and registered instances in Consul.

Intern | Virtually Testing Foundation January 2021 – March 2021

- Updated container images and backup processes; created VM storage policies.

Education

B.Tech, Information Technology | Lovely Professional University, Jalandhar | 2017 – 2021

Intermediate (Non-Medical) | Sri Chaitanya Techno School, Visakhapatnam | 2015 – 2017

Certifications & Training

- Red Hat Certified System Administrator (RHCSA) workshop

Languages

English, Hindi
